System Integration

IR3 provides powerful integrations with other key business systems, allowing customers to conduct analyses on core operational activities within both fleet and emergency services operations.

Features

IR3 can integrate with the following systems:

- AssetWorks – fleet management software
- Fleet management systems
- Niche – crime and intelligence software
- Steria Storm - Command and control software
- ControlWorks - Command and control software
- Steria Storm Command and Control

- SAP Systems
- Origin Duty Management
- Microsoft Active Directory
- Northgate Connect
- Northgate XC
- Capita TRLI (Officer radio data)
- Capita TRSI (Officer radio data)

Don't see your system? The LBA development team can also provide integration development using APIs with many other systems.

Benefits

- ✅ IR3 provides a single platform for fleet and people resource analysis which is presented in an easy-to-understand graphical format

- ✅ Emergency services systems data can be viewed and analysed within IR3, so users do not have to go to multiple systems for analysis

- ✅ Up to date vehicle mileages can be provided to the organisation's fleet management systems, thus eliminating the need for manual mileage collection

- ✅ Demand, such as incidents, patrols, and crime, can be shown within other IR3 system features so enhancing the data which can be analysed within the system
