

IR3 Mobile App

Enhance policing efficiency with our integrated app that empowers officers through features like Google Maps navigation, real-time incident alerts, and detailed vehicle activity tracking. Facilitate seamless communication, prioritise tasks, and monitor team activities while optimising resource allocation. With customisable incident categorisation, automatic Driver Scores, and insightful activity summaries, this app revolutionises police coordination and management, ensuring officers stay informed, connected, and effective throughout their shifts.

Features

- Integrates with Google Maps for in-car navigation, enabling officers to use their devices for incident directions.
- Record comprehensive vehicle data: time, distance, and vehicle role.
- Instantly locate incidents, vehicles, and nearby individuals. Filter based on grade, status, equipment, or skillset.
- Facilitate officer communication, connecting via work mobile numbers on the map.
- Automatically calculate Driver Behaviour Scores within the day's trips.
- Explore nearby objectives, sort by proximity, and prioritise non-compliance.
- Highlight ongoing objectives, emphasising non-compliance for efficient task management.
- Provide daily summaries, including time spent on objectives and incidents.
- Showcase activity history via app timeline, featuring station, hospital, and workshop visits.

Benefits

- Swift incident routing via the app enhances response time and eliminates address duplication
- Digital vehicle logbook reduces admin by categorising trips as personal or business
- Graded alerts assign officers to high-priority incidents, reducing response times
- Clear view of activities empowers officers to efficiently manage tasks and clear incidents
- Seamless in-app communication fosters officer connectivity and safety
- Driver behaviour scores highlight vehicle efficiency and areas of improvement
- Objectives sorted to the proximity to a location enabling officers to take swift action for quicker responses
- Automated prompts ensure easy prioritisation and a streamlined process
- Task overview prevents duplication and supports informed decision-making
- Activity tracking ensures compliance with SLAs and informs follow-up tasks
